## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Adeel Akhtar on 04/28/06.

The application has been amended as follows:

**Cancel claims 1-5 and 25-28.**

#### ***Allowable Subject Matter***

Claims 6-12, 29-30 are allowed.

The following is an examiner's statement of reasons for allowance: As Applicant argues in the Appeal Brief dated 1/10/05, Sekine fails to teach after making the silicon electrode rugged, replacing the silicon in the rugged electrode structure with a metal. Sekine teaches that the replacing of silicon with metal atoms causes the silicon to become rugged. This subtle distinction is made clear from Applicant's specification which teaches that the silicon layer is first made rugged by annealing or seeding the silicon layer; subsequently, a metal halide treatment acts to replace the silicon with metal. Prior art teaches forming rugged silicon electrodes through annealing and seeding, but fails to further teach nor suggest replacing the silicon with a metal as claimed by the Applicant. Moreover, Sekine teaches the replacement of silicon with metal,

however fails to teach nor suggest forming a rugged silicon layer prior to the replacing.

Therefore, Applicant's claims are deemed allowable over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
